

## **Dr. Sebastjan Perko**

Sebastjan Perko is co-founder and CEO of biggest private dental clinic in Slovenia, Ustna Medicina d.o.o. Ljubljana, i.e. Medical Dentistry Ltd, founded in 2013 by which he is able to connect everyday clinical experience and issues with scientific approach.

He graduated from Dental medicine programme at Medical faculty, University of Ljubljana in 2006. Immediately after he enrolled to Nanosciences and nanotechnologies doctoral study programme at Jožef Stefan International Postgraduate School studying processing of high-performance zirconia ceramics, where special focus was devoted to colloidal processing, shaping, sintering and mechanical properties of zirconia ceramics.

He received his PhD in 2012.

Already during studies he was working clinically implementing gained knowledge and seeking for advanced solutions. He is implementing them by maintaining close collaboration with Jožef Stefan Institute, having an on-going project on next generation bioactive endodontic cement fillers, and Slovenian companies conducting research and development of innovative high-end dental products for restorative dentistry.
