

A note to the Reviewers

The authors' instruction has been extended. It can be downloaded at the right side of this web page:

<http://www.springer.com/chemistry/journal/10967>

The checklist below will appear while submitting for your review. This reflects the preferences of the journal. You can use it in any form in your review.

If your review contains just text, please copy it into the Comments windows. If it also contains figures, special characters etc., you can upload it as a separate document. Please remove all information from it based on which you could be identified (e.g. Properties/Author).

Reviewers' checklist

Please help us in qualifying the manuscript. Besides your usual review, please answer with one these scores to the questions below. You can also comment each point, i.e. you can use this list as a guideline for the review.

Scores:

5 – very much so

4 – so, but not always

3 – acceptable, or no comment

2 – not really

1 – not at all

For the most important questions, reply with a doubled score, i.e. its maximum is 10. Please enter the scores in the square brackets: [].

- The paper is original and it contributes to science with a significant novelty. (Double score)
- The length of the paper is appropriate.
- The English of the paper is good. (Double score)
- The paper is well-written and understandable. (Double score)
- The title is informative.
- The abstract is concise and informative.
- The keywords are properly chosen to help categorization.
- The introduction summarizes the fundamentals, gives a critical evaluation of the previous research on the topic, and objectives.
- The description of the methods and/or the experimental work is adequate.
- The interpretation and the discussion of the results are careful and comprehensive. (Double score)
- The conclusions sound convincing.
- The references cover the recent and the past activities in the field including papers reported in this journal. (Double score)

- The number and the quality of the figures and the tables are suitable. (Double score)
- The numbers are written with the proper number of significant digits. The physical quantities are written with the proper units. Error calculation is good.

Sum of your scores. (Max. 100) Please use this number to rate the paper.

Here, answer with YES or NO (no score should be given)

- +1. Do the references follow the format descriptions?
- +2. Is the resolution of the figures high enough?

Please give your specific comments below.

Thank you for your collaboration
